## Why Seal Asphalt?

1

### Prevents Oxidation

Asphalt Sealer shields against the drying action of the sun; its coal tar base prevents reeling, cracking and deterioration.

2

### Resists Gas & Oils

Only coal tar sealers protect asphalt from the destructive softening effects of oils & solvents. Sealer resists gasoline, oils, acids, jet fuels & de-icers.

3

### Weatherproofs

Sealer prevents water seepage into the porous asphalt structure, stopping weather damage.

4

### Beautifies Pavements

Asphalt Sealer has a consistent slate black color to restore that clean, rich, new-look appearance to all asphalt surfaces.

5

### Low-Maintenance

Sealer fills surface voids, leaving a smooth even-textured surface easy to clean and maintain.

6

### Economical

Asphalt, a petroleum product, has tripled in cost. For pennies per square foot, sealer can protect your investment and prevent costly repairs.
